EDUCATION

University of Cincinnati - Cincinnati, Ohio **Graduating: Fall 2026**
Bachelor of Science, Computer Science, Minor in Statistics

- **Primary Coursework**: Machine Learning, Deep Learning, Artificial Intelligence, Data Science, Data Structures, Web Development, Regression Analysis, Linear Algebra

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL, R, JavaScript, JMP, React, HTML/CSS
Software: AWS, Microsoft Azure, Databricks, PowerBI, Docker, Git, HEEDS, Flask, Visual Studio
Machine Learning & AI: PyTorch, TensorFlow, XGBoost, OpenCV, Gymnasium, Stable-Baselines3, LLM agents, RAG, MCP

EXPERIENCE

GE Aerospace | Cincinnati, Ohio **Dec 2025 - Present**
Applied AI Engineer Intern

- Developed and validated an AI agent that auto-classifies software/documents by regulatory status (regulation, military data, or license required), cutting 30 min of touch time across 7,500 docs/month, a projected $8M/year; briefed the company VP.
- Architected and own a production Retrieval-Augmented Generation (RAG) assistant over engineering drawings and inspection docs, built on AWS vector embeddings and a managed knowledge base, cutting CMM rework lead time 50%; deployed to the internal agent library.
- Built an agentic automation system on a custom Python MCP server whose agent autonomously invokes HyperMesh mesh-morphing on HPC, cutting a 6-month CMM workflow to 5 days and earning a Corporate Impact Award.
- Developed and maintain QC-Calcite, a production quality-control tool (Python, JavaScript, SQL) serving 200+ internal users.
- Led org-wide AI enablement: onboarded 30+ engineers to Claude Code, presented agentic-AI workflows to 200+ engineers and executives, and advised senior leaders, including Executive Directors, on AI adoption.

P&G Digital Accelerator | Cincinnati, Ohio **Aug 2025 - Dec 2025**
Data Science Intern

- Automated modeling-and-simulation workflows by integrating HEEDS with JMP, cutting manual setup and design-space exploration by 50%.
- Engineered a computer-vision pipeline converting production-line footage into inputs for a surrogate neural network in Plant Simulation, speeding KPI prediction 30% and reducing downtime 15%.
- Developed AI-agent workflows that streamlined repetitive simulations and simplified KPIs for business stakeholders.

TQL | Cincinnati, Ohio **Jan 2025 - Aug 2025**
Data Science & Analytics Intern

- Fine-tuned a production XGBoost pricing model, improving real-time rate-recommendation accuracy by 8%, a core input brokers use to quote loads.
- Migrated legacy data workflows to Databricks on Azure and built a PowerBI dashboard surfacing negative-revenue brokers, actively used by Sales VPs to guide coaching and performance strategy.

PROJECTS

DraftVision - NFL Draft Prediction Platform | Python, React, Flask, XGBoost, Docker **2026**

- Designed and deployed (Docker on Fly.io) a full-stack ML web app predicting NFL draft success for 9,000+ college and high-school prospects via a calibrated XGBoost/CatBoost ensemble over 16 engineered features and live ESPN/CFBD API data, reaching about 73% held-out accuracy.
- Added a ranked leaderboard with an offline cache pipeline (sub-100ms loads), fuzzy name resolution, and cosine-similarity player comps; React and Auth0 SPA served from Flask.

Quantum Macro Portfolio Optimizer | Python, Qiskit, QAOA, NumPy **2026**

- Built a QAOA quantum optimizer (Qiskit) framing K-of-N asset selection as a QUBO/Ising Hamiltonian, benchmarked against exact and simulated-annealing solvers; 102 tests with cross-representation equivalence proofs and a look-ahead-safe FRED macro pipeline.

ACTIVITIES

Artificial Intelligence Society **April 2024 - Present**
Technical workshops plus the Microsoft Azure AI bootcamp and MidwestCon, gaining hands-on cloud-AI experience.

YouTube Content Creator **April 2023 - Present**
Grew a football-analytics channel to 15,000+ views on college-football statistics (Final Cut Pro, DaVinci Resolve).

AWARDS & HONORS

3x GE Aerospace Corporate Impact Award (CMM Automation, Project Leadership, CMM Hackathon) **2026**
AWS Certified AI Practitioner | AWS Certified Cloud Practitioner **2025**
Machine Learning Specialization (Stanford / DeepLearning.AI) | Google Advanced Data Analytics **2024 - 2025**
