EDUCATION

University of Cincinnati - Cincinnati, Ohio

Graduating: Fall 2026

Bachelor of Science, Computer Science, Minor in Statistics

- **Primary Coursework:** Machine Learning, Deep Learning, Artificial Intelligence, Data Science, Data Structures, Web Development, Regression Analysis, Linear Algebra

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL, R, JMP, React, CSS, HTML

Software: PowerBI, Databricks, Microsoft Azure, HEEDS, Docker, Git, Visual Studio, Jira, ServiceNow

Machine Learning & AI: PyTorch, TensorFlow, XGBoost, OpenCV, Gymnasium, Stable-Baselines3

EXPERIENCE

P&G Digital Accelerator | Cincinnati, Ohio

Aug 2025 - Present

Data Science Intern

- Automated modeling and simulation workflows by integrating HEEDS with JMP statistical analysis, reducing manual setup and design exploration by 50%
- Integrated computer vision to convert production-line data into inputs for a surrogate neural network driving KPI predictions in Plant Simulation
- Developed AI Agent workflows to streamline repetitive simulations tasks, improve efficiency and simplify KPIs to business stakeholders

TQL | Cincinnati, Ohio

Jan 2025 – Aug 2025

Data Science & Analytics Intern

- Fine-tuned a production XGBoost pricing model, improving forecast accuracy for real-time rate recommendations by 8%, providing a core component to brokers
- Migrated legacy data workflows to Databricks on Azure and developed a PowerBI dashboard identifying brokers with negative revenue; the report is actively used by Sales VPs to inform coaching and performance strategies
- Served as a data liaison across departments, taking business requests and translating them into custom SQL data-pulls and PowerBI reports

University of Cincinnati | Cincinnati, Ohio

May 2024–Aug 2024

Software Developer Intern

- Developed a machine learning model to predict NFL prospect success using historical college football data
- Evaluated model accuracy using real-player success/failure outcomes, achieving a 71% accuracy on binary success/failure determinations

PROJECTS

Deep Reinforcement Learning Football Bot | Python, PyTorch, Gymnasium

July 2025

- Trained a Deep Q-Network (DQN) on real NFL play-call data to optimize drive-by-drive strategy decisions
- Built a custom Gymnasium environment simulating football gameplay with stateful transitions and scoring logic
- Visualized plays with animated drives, field overlays, and labeled game states to enhance interpretability

MedicalParse | Python, HTML, Flask

Feb 2024

- Led development of a health-tech diagnostic platform that analyzes user-input symptoms and returns the top 10 most relevant conditions using OpenAI and WHO APIs

ACTIVITIES

Artificial Intelligence Society

April 2024 – Present

- Participated in technical workshops and meetings covering the latest advancements in AI
- Engaged in the Microsoft Azure AI bootcamp and MidwestCon, gaining experience in cloud based AI services

Youtube Content Creator

April 2023 – Present

- Grew a football analytical channel to 15,000+ views, covering statistics involving college football players
- Garnered skills in video editing and content creation including Final Cut Pro and Da Vinci Resolve

AWARDS & HONORS

Machine Learning Specialization

Apr 2025

Packt Quantum Computing

Mar 2025

Google Advanced Data Analytics Certification

Apr 2024
